Awards & Admissions Committee

Two graduate students from GGE are needed for the Awards and Admissions Committee. This is how you can influence next years entering class. Get involved and have your voice heard. For more information contact Silvia at 752-6752

READER NEEDED

ECL 200A is in dire need of a reader for up to 100 hours. Previous experience in the 200 series is preferred, but experience in ecology is an acceptable substitute. Will consider splitting the readership if necessary. A speedy response is requested from anyone interested. Contact Ted Foin.

The Wetland Society at UCD will have its next meeting on Monday the 9th of November at 6 pm in 102 Hutchinson. Stop by and check out the new bulletin board at 3101 Wickson. We have a space for a graduate student work exchange where interested parties can help one another with field work as well as gain further personal experience. We are also very much involved in the planning of a Society of Wetland Scientists, Western Chapter Conference and could use help in many ways. Contact Becky Post, 752-4326.

VOLLEYBALL FOR ONE AND ALL!!

The EGSA purchased a volleyball net at the beginning of this quarter. We have begun a weekly EGSA volleyball game on FRIDAY afternoons from 3 o'clock to whenever on the lawn in front of Wickson Hall. ALL are encouraged to stop by and play. The games are geared for fun, not frustration and fright so any talent level may play.

The equipment is also being made available to Ecology graduate students for private use. A \$50.00 deposit is required (refundable upon equipment return) in addition to signing an agreement to replace any lost, stolen or damaged parts. If you are interested in using the gear contact Peter Hodum (Dept. of Avian Sciences) at 752-2401.

REMEMBER TO VOTE
ON TUESDAY,
NOVEMBER 3rd

RETURN ADDRESS: EGSA, DIVISION OF ENVIRONMENTAL STUDIES, WICKSON HALL, UCD

MAIL TO:

NEXT EGSA MEETING: NOV. 5th, 5:30 at the YERC

\$ FUNDING AVAILABLE \$

Grassland / Oak Savannah Research
The Nature Conservancy is looking for a student to develop a cooperative project with private ranching and the Bureau of Land Management in an on-going grassland research program. In general, the project should include studies of grazing and grazing management effects on the plant communities and/or perennial grass populations in Tehama County. The student should be willing to dedicate time to developing the project with the cooperators as well as two to three years of research. This is primarily an opportunity to conduct the student's own rigorous research. It also presents the great opportunity and challenge to create a cooperative relationship between groups with many differences by focusing on common goals and interests. For more information contact either of the following as soon as possible.
